

The "throw" keyword : → (Experience)

The "throw" keyword is mostly used to create / throw custom exceptions or User Defined Exceptions :

: age < 18 → Uneligible

: withdrawal Amt > balance → Insufficient Funds

* throw keyword is used inside the method.

Important points for Interviews: →

(i) "throw" can throw only one exception at a time.

(ii) Code after "throw" is "unreachable".

(iii) You can throw :

(i) Built-in exceptions

(ii) User-defined exceptions

(iv) Checked Exceptions — must be handled or declared.

(v) Unchecked Exceptions → handling is optional.

* Can we write a try block without catch or finally ?

⇒ Yes " (try with resource) "

* If we don't need to close it — how is it getting closed ? (Automatically)
